EDELRID Announces; The Tommy Caldwell Signature Line

From the Fitz Traverse in Patagonia to the Dawn Wall on El Capitan, the new Tommy Caldwell Signature Line is designed to equip you for the world's most demanding climbs and biggest walls.

Tommy joined the EDELRID Athlete Team in 2016, first supporting a core product of the company: EDELRID's climbing ropes. After a year of working directly with the brand, Tommy chose to make the bold move to realign his climbing gear related sponsorships exclusively to EDELRID and take an active role in product testing and development. The result of EDELRID's new partnership with Tommy is the exclusive and limited Signature Line launching in January of 2018.

For Immediate Release

Tommy expressed his commitment to the brand by saying; “I believe EDELRID has the ability to change our ideas of how we move around in the mountains. I am partnering with EDELRID because of their innovation and their ability to be nimble, because they hold themselves to the highest environmental and quality standards, and because they are family owned and value based. These qualities are where I hope the future of climbing lies, and I’m excited to be a part of it.”

The initial output of the Tommy Signature Line will include 2 new ropes, with very high sheath proportions, making them ideal for working routes or big walls and a new harness designed for ultimate comfort and performance on rock or ice. As with all of EDELRID’s ropes, Tommy’s signature line will fulfill the strict environmental standards of the sustainable bluesign® system, thus furthering EDELRID’s strong sustainable rope manufacturing history and emphasizing Tommy’s passion for sustainability.

Ace Ambassador

The harness chosen by our athletes. The Ace represents the latest in harness design, experience, and expertise – demanding routes on rock and ice.

Canary Pro Dry 8,6 mm

Our ultra-light, high-end rope with triple certification. With its 8.6 mm diameter and weighing in at just 51g per meter, the Canary is one of the thinnest and lightest single ropes in its class. With a sheath proportion far exceeding that of other sub 9mm ropes, the Canary is the most robust lightweight rope on the market. Exceeds the UIAA Dry Standard.

For Immediate Release

Tommy Caldwell Pro Dry DT 9.6 mm

This Bi-Pattern rope sports a high sheath proportion making it ideal for working routes or big walls. Exceeds the UIAA Dry Standard.

Tommy Caldwell DT 9.6 mm

This Bi-Pattern rope sports a high sheath proportion making it ideal for working routes or big walls.
